

STRONG BONDS

Leading Technology in Adhesives & Sealants

BEST PERSPECTIVES

KÖMMERLING is one of the world's leading companies in the adhesives and sealants industry. We are an international systems supplier in the glass, transport, construction, industrial and renewable energies application areas. With our strength in innovation and product quality, we are continuously setting new benchmarks.

KÖMMERLING – EXPERIENCE INNOVATION

Since KÖMMERLING was founded in 1897, our company headquarters have been located in Pirmasens in the south-western Palatinate. From here, we have again and again set new milestones in the development of new technologies for adhesives and sealants. Thanks to our insight and many years of experience, we are committed to the highest quality requirements.

Today, KÖMMERLING has an outstanding position in the world's growing market of adhesives and sealants for energy-efficient applications – not least, we are a market leader for insulating glass sealants, and adhesives for producing refrigerated vehicles. Our many years of technical expertise, combined with modern production procedures, enable us to develop and produce an extensive, high-performance product range. Since 2013, we have been part of the international Royal Adhesives and Sealants Group and are thus among the top ten companies in our industry – a position that we want to retain and develop: we will continue to convince you with our performance and strength in innovation in the future – and impress you with the familiar KÖMMERLING quality.

Facts

Established: 1897

Company headquarters: Pirmasens

Production facilities: Germany and China

Employees: 400 worldwide

PHILOSOPHY

Our aspirations drive us: only those who set themselves tough goals are prepared to seek out brave and innovative ideas day after day.

The technology of the future

In close collaboration with its customers, KÖMMERLING makes a sustainable and valuable contribution to improving energy efficiency and substituting mechanical fasteners.

The customer as a partner

The focal point of all our deliberations is always the question of what we can do for you and how we can become an even better partner for you. It is no coincidence that we maintain a partnership-based relationship with our customers that has grown over many years – we live in a culture of cooperation in which trust plays the key role.

Creating added value

We do not simply place any old product on the market, but, in close technical collaboration, we strive to optimize our customers' product and process quality and, in this way, create added value. This is what makes KÖMMERLING so successful.

GLOBAL RESPONSIBILITY

A pair of hands is shown holding a glowing, translucent globe of the Earth. The globe is illuminated from within, showing a bright blue and white aura around its edges. The continents of Africa, Europe, and Asia are visible, with some areas appearing to glow with yellow light, possibly representing energy or urban development. The hands are positioned on either side of the globe, with fingers gently gripping it. The background is dark and out of focus.

In all its pursuit of growth, KÖMMERLING is aware of its global responsibility to society. Our high quality adhesives and sealants make a valuable contribution to improved energy efficiency – and therefore help save scarce natural resources.

WE LOOK CLOSELY

We understand the market trends and are in close contact with our customers. Only in this way can we recognize individual product requirements quickly and convert them into tailor-made system solutions. In this way, KÖMMERLING ensures a permanent competitive advantage for its customers.

CREATING TECHNOLOGY

Technically complex, with high added value, perfectly designed to meet processing needs – we have high expectations of our products. This is why research and development is fundamental to our company – we can only be confident of meeting our own and your individual demands for special products within our own company.

Sustainable quality

KÖMMERLING products are extensively tested to verify their properties and suitability for the intended applications. Our strict in-house testing procedures ensure consistently high quality and a high level of safety in practical use.

KÖMMERLING is among the few adhesive and sealant manufacturers worldwide to meet the standards for quality management (ISO 9001:2008), environmental management (ISO 14001:2004), occupational health and safety management (BS OHSAS 18001) and energy management (ISO 50001:2011). We provide evidence of our high standards by having them audited and certified by independent third parties.

SERVICE THAT KNOWS NO BOUNDS

At KÖMMERLING, we place great emphasis on long-term, partnership-based business relationships. We win the confidence of our customers with high-quality product ranges, tailor-made system solutions and punctual delivery. A fast, competent and personal response to all enquiries is also important to us. Our global presence ensures that we can deliver this wherever in the world our customers may be.

Setting benchmarks

Competent support is key for us – and this includes on-site work at your premises. We can help you, for example, with commissioning and are readily available to support you with product changes, quality and production checks and system certification at your premises.

Knowledge creates trust

Expertise on both sides: in order to provide you with specific specialist knowledge, we provide regular customer and dealer training sessions. Technical documentation and guidelines are provided for this.

KÖMMERLING. COMPETENT. CUSTOMER-FRIENDLY.

The competent expert who supports you on site, addresses your individual requirements and is also available to help in difficult situations is the custom at KÖMMERLING. Only in this way can a business relationship develop that is characterised by trust and based on partnership, and from which all those involved benefit over the long term.

KÖMMERLING

KÖMMERLING CHEMISCHE FABRIK GMBH

CRYSTAL CLARITY AT ITS BEST

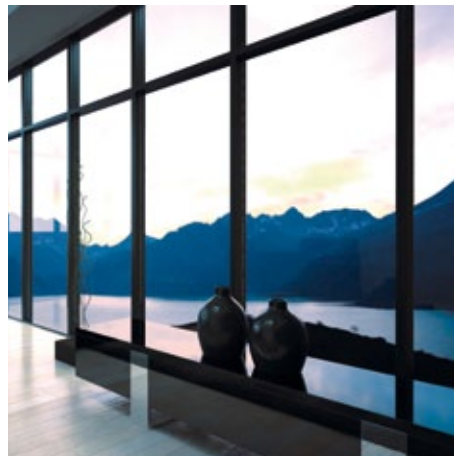

KÖMMERLING is an international technology leader for adhesives and sealants for many very different glass applications. Our products, such as our market-leading warm edge system KÖDISPACE, meet the highest standards. Furthermore, our product range includes premium solutions for glazing of all types.

GLASS

We have repeatedly revolutionised the market for glass applications with our product developments. An example of this is the first primerless, 2-component sealant GD 116 – with this, we were able to greatly simplify the production of insulating glass. We also launched the first low- viscosity polysulfide formulation for sealing systems – a further milestone in the history of insulating glass.

KÖMMERLING constantly sets new milestones in the development of innovative system solutions. Our portfolio extends from primary and secondary sealing to warm edge systems and to adhesives and sealants for structural glazing and direct glazing applications. Cast resin for manufacturing special laminated glasses rounds off our range.

KÖMMERLING provides the most complete product range for the glass industry – and thus also solutions for almost any application from a single source. Our adhesives and sealants meet the highest international certification standards and are additionally checked in accordance with much stricter internal criteria.

TRANSPORT

Energy-efficient vehicles are subject to high demands. In order to meet these, we rely on technically sophisticated, customer-specific solutions. The result is innovative products that make welding, bolts and riveting obsolete in many cases.

In the automobile industry, original equipment manufacturers, suppliers and repair service providers benefit equally from this.

KÖMMERLING products contribute to improved noise reduction for vehicles such as cars, trucks, buses, motor homes and ships, which in turn leads to improved comfort. In addition, they deliver a weight reduction, which directly results in lower fuel consumption – and thus conservation of natural resources. In this way, it is nature that ultimately gains from the use of our products for more efficient transport.

FOR THE MOBILITY OF THE FUTURE

The weight reduction that is achieved with modern lightweight construction is essential for efficient mobility. In transportation, the intelligent use of innovative adhesive technologies leads to the desired result. KÖMMERLING provides appropriate adhesives which take into account individual manufacturing processes and the most varied material combinations.

SUNNY OUTLOOK

Renewable energies have become an integral part of modern life, and an increasing number of innovative solar panel and wind turbine manufacturers place their trust in KÖMMERLING solutions. Our product range is tailored to meet the high levels of strain and requirements from various environmental influences and operating conditions.

RENEWABLE ENERGIES

KÖMMERLING develops and produces high quality adhesives and sealants for photo-voltaics, solar-thermal and wind energy. We provide individual solutions that meet all the requirements for strength, resistance to UV, temperature and ageing.

We also have suitable products, which are perfectly coordinated to one another, in our portfolio for bonding, sealing or installing PV and solar modules. With this, we make a valuable contribution to sustainability and environmental protection.

However, in the end it is not our products alone that contribute to saving resources: through our environmental and energy management systems, we ensure the long-term environmental compatibility of our operating processes.

CONSTRUCTION

Quality rather than quantity: when it comes to civil engineering works, we concentrate on special products. Here, our developments focus equally on functionality, design, indoor comfort and longevity.

KÖMMERLING adhesives allow bonding with extremely high stiffness and resistance that is nevertheless so elastic that it compensates for the natural movements of the materials used in construction without causing damage to the seal

Both inside and outside, from the cellar to the facade and the roof, our adhesives and sealants offer many different application possibilities and thus open up numerous design options for architects and planners.

KÖMMERLING adhesives and sealants – the innovative alternative to conventional bonding technologies such as plugging, nailing, welding or riveting.

FROM THE CELLAR TO THE ROOF

Live comfortably, work efficiently: buildings play a major role in our everyday lives. KÖMMERLING provides functional and aesthetic solutions for building owners and planners. Our aim is to increase living comfort and energy efficiency. For this purpose, we provide you with high quality products and extensive consultation during the planning phase.

INTELLIGENT PROBLEM SOLVERS

KÖMMERLING produces adhesives and sealants that can be found in daily life. Whether for shoe production or white goods, the applications are as many and varied as the requirements that our products fulfil. KÖMMERLING products offer maximum functionality and longevity .

INDUSTRIAL ASSEMBLY

Whether the issue is temperature fluctuations, humidity or high UV radiation, KÖMMERLING products signify maximum reliability in the most varied industrial applications.

Particularly in shoe manufacture, the materials and adhesives used need to meet extremely high standards. Our products bond many different materials in such a way as to maintain the substrate characteristics , even in sensitive materials. With almost 120 years of experience, we are pioneers in this area.

The main objective is to ensure a strong and secure bond – but alongside this, the integration of other functions is also possible, including sound dampening, electrical conductivity and thermal insulation. Products from KÖMMERLING are thus transformed into intelligent problem solvers for industrial applications of the most varied types.
